

Successful funding scouting @ SpectroNet headquarter

Dear Clusterpartner and Friends,

with this e-mail we want to bring you up to date on our last cluster activities. You will be informed about upcoming SpectroNet events, news from partners of our cluster, new job offers, events and fairs.

On October 23rd, 2019 we successfully finished our first **funding scouting (Fördermittelscouting)** at the Technologie und Innovationspark Jena.

The workshop, organized by the SpectroNet Academy, was completely free for all of the **26 participants and presentators**. The event was phased in **three sessions** filled with **ten presentations**. One of which was the practical workshop held by our coach Mathias Feith with the topic "Social media as an instrument for customer acquisition and sales increase".

All Videos of the funding scouting are available at the [SpectroNet Academy](#).

News @ SpectroNet Cluster

New Clusterpartner NKT Photonics A/S

SpectroNet @ Embedded Vision Europe 2019

- New insights and trends in the field of embedded vision
- All presentations (PDF) available @ SpectroNet Academy
