

in collaboration with

[6th International Conference on Optical Characterization of Materials \(OCM\)](#)

Optical Characterization of Materials in Industry and Beyond

21st March 2023, Karlsruhe, Germany

Registration 08:30 a.m. CEST

Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung IOSB

Fraunhoferstraße 1, 76131 Karlsruhe, Germany

Register as Speaker or Participant

Dear partners and friends,

We are pleased to invite the Photonics and Machine Vision Community to Karlsruhe (Germany) for the next SpectroNet Collaboration Conference (SCC).

SCC 2023 conference will holistically address the topic of optical as well as spectral characterization of materials. This includes applications in biomedical, life science, automotive, industry and beyond. As always, participants can look forward to a wide range of presentations from leading experts in these fields.

Through the agile and interactive event format we have developed, we create a platform for joint exchange as well as subsequent productive collaboration.

You are very welcome to give a presentation at the conference. There is also the possibility to support this conference as a sponsor in order to promote your brand to a wide professional audience. Please feel free to get in contact with us for further information.

Supported by:

Conference Website & Agenda

There will be **3 sessions** with a total number of **23 presentations** about the following topics:

- Session 1: Sensors & Systems for Optical Characterization of Materials
- Session 2: Methods & Algorithms for Optical Characterization of Materials
- Session 3: Applications & Challenges for Optical Characterization of Materials

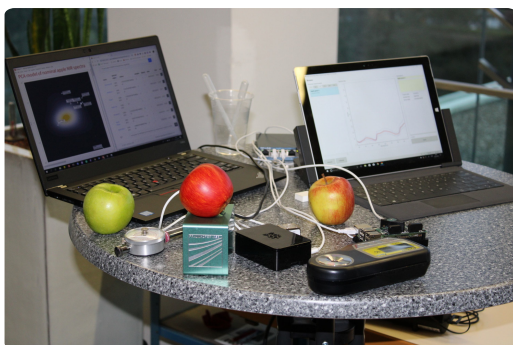

Well-known experts from leading companies and research institutions will give methodical, scientific, technical and social insights on their latest developments.

Furthermore, there will be:

- an **exhibition** with innovative products and services and
- an exclusive **Evening Event** with Live Demonstrations.

*Following the SCC on 21.03.23 the 6th Conference on Optical Characterization of Materials (OCM) with scientific focus will take place on 22.03.-23.03.23 in Karlsruhe.

All information about the OCM event can be found [here](#).

Register as Speaker or Participant

We look forward to welcome you in Karlsruhe.
